Griffin – Hunter Balancing with DSP9700

Four-Wheel Balancing – Road Force Balancing

A perfect compliment to a set of new tires - give your car that smooth and straight feel. Load Force Balancing of all four wheels and tires suggests an optimum corner for each tire-wheel on your car for straight tracking and a smooth ride. Balances the tire-wheel to one-tenth of an ounce. Places weights behind the spokes for a clean look. Ask about Match-Mounting. Tire Mounting is a separate operation with it's own unique pricing. 2 Certificates at AudiFest!!
